Section -A - (Reading - 10)

I. Read the passage carefully and answer the following questions given below.

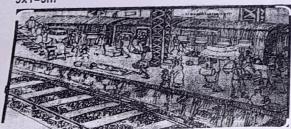

Once upon a time, in a small village, there was a young girl named Lily. Lily loved to explore the woods near her home. Every day after school, she would take her little dog, Max, and they would go on adventures together. They loved discovering new paths and playing by the river. One sunny afternoon, while they were walking along a new path, they found a hidden garden. This garden was filled with colorful flowers and butterflies. Lily was amazed by the beauty of the garden. She had never seen such a lovely place before. Max barked happily as he ran around, chasing the butterflies. Lily decided that she would visit the garden often. She thought it was the perfect place to relax and enjoy nature. She picked a few flowers to take home and made a small bouquet. When she returned home, she showed the flowers to her mother, who was also delighted. Lily's mother suggested that they could plant similar flowers in their own garden.

The next day, Lily and her mother went to buy seeds and plants like those in the hidden garden. Over the weekend, they planted the flowers in their backyard. Max would sit by the flowers and watch the butterflies. Every morning, Lily would water the plants. The garden became a special place for both Lily and her family. They spent many happy hours there, enjoying its beauty and peace.
